**JM&A Group Launches Term Care Select
to Safeguard Vehicles Against the Unexpected**

Deerfield Beach, Fla. – JM&A Group, one of the largest independent providers of automotive finance and insurance products, recently launched a new product for its dealer customers. Term Care Select is a new comprehensive plan designed for lease and short-term vehicle owners. It offers drivers premium mechanical failure protection on the majority of mechanical components, as well as wear and tear coverage on items such as brake pads, batteries, headlamps, belts and hoses, fuses, light bulbs and windshield wiper blades.

This new program is an evolution of JM&A Group's successful Lease Care and Courtesy Care products and will be provided to thousands of dealers across the United States through Fidelity Warranty Services, Inc. JM&A Group has helped automobile dealers achieve unsurpassed levels of finance and insurance performance in the retail automotive industry since 1978.

"Term Care Select allows us to give our dealers the exact fit of exceptional service and coverage for their customers," said Forrest Heathcott, president of JM&A Group. "The plan combines the best of our services to provide new car owners the added comfort and security they need if the unexpected happens."

In addition to safeguarding service and maintenance items on a new car, Term Care Select customers receive a complimentary Driver's OneCard membership, which gives them access to the benefits and privileges enjoyed through the Cross Country Motor Club, Inc. program. These services include key replacement services, 24-hour roadside assistance, lockout protection service, trip interruption as well as other travel discounts and perks.

JM&A Group gives its dealer customers financial stability and quality retail products and systems to help sell more vehicles, and maximize profitability on vehicle sales and after-market opportunities. Fidelity was established in 1978 to provide extended service and pre-paid maintenance contracts for virtually all vehicle makes and models.
